

NOTES:

1. Assembly to meet IPC-A-610 Class 2 standards
2. Polarity marks:
 - a. Dots and bevels near ICs and modules indicate pin 1
 - b. '+' symbols near polarized capacitors indicate positive terminal
 - c. Bands near diodes indicate cathode, although standard diode symbols are used wherever possible
 If polarity issues arise, please e-mail for clarification (understood that this may delay order)
3. Modules U2, U4 have special requirements:
 - a. must not be soldered using a vapor-phase process,
 - b. if not assembled in a class 10'000 cleanroom, holes in top of casing should be covered during assembly,
 - c. must not be cleaned – no-clean solder paste must be used
